Catecholamine Research in the 21st Century: Abstracts and Graphical Abstracts, 10th International Catecholamine Symposium, 2012

Through the use of extended graphical abstracts and some traditional text-only abstracts this collection provides, a record of and roadmap to, the research presented at The Tenth International Catecholamine Symposium (XICS) held in September of 2012. Organized around ten general themes, each is introduced by a short overview identifying interesting research programs, results and potential areas of growth. The collection is a roadmap to key research and future opportunities for new catecholamine research programs and will be of interest to neuroscientists and clinical neurologists interested in understanding the current and future state of catecholamine research.

*Details the leading research efforts and focus on catecholamines

*Provides a guide to the diverse catecholamine research efforts across key themes including, Synthesis and Storage, Release and Re-uptake, Metabolism, Catecholamine Receptors and Catecholaminergic Signaling

*Includes impact on clinical neurology, drug abuse and addiction and issues in psychiatry and psychology
