Environmental Deterioration and Human Health: Natural and anthropogenic determinants

Environmental Deterioration and Human Health: Natural and anthropogenic determinants

This book discusses the natural and anthropogenic determinants of the environment and their impact on human health. It **throws light on the perspectives of climate change with case studies from Australia, India, Italy, and Latin America. Themes covered are** ecology of antibiotic resistant microorganisms, pesticide and heavy metal (arsenic) problems in natural environment; molecular advances in understanding of microbial interactions; ecological studies of human/animal health and diseases; food security, technological developments and more. The various chapters incorporate both theoretical and applied aspects and may serve as baseline information for future research through which significant development is possible.
