## Materials Design Inspired by Nature: Function Through Inner Architecture (RSC Smart Materials)

The inner architecture of a material can have an astonishing effect on its overall properties and is vital to understand when designing new materials. Nature is a master at designing hierarchical structures and so researchers are looking at biological examples for inspiration, specifically to understand how nature arranges the inner architectures for a particular function in order to apply these design principles into man-made materials.

**Materials Design Inspired by Nature** is the first book to address the relationship between the inner architecture of natural materials and their physical properties for materials design. The book explores examples from plants, the marine world, arthropods and bacteria, where the inner architecture is exploited to obtain specific mechanical, optical or magnetic properties along with how these design principles are used in man-made products. Details of the experimental methods used to investigate hierarchical structures are also given.

Written by leading experts in bio-inspired materials research, this is essential reading for anyone developing new materials.

### **From reader reviews:**

#### **Todd Grossi:**

Do you have favorite book? Should you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each publication has different aim or maybe goal; it means that guide has different type. Some people feel enjoy to spend their time and energy to read a book. These are reading whatever they have because their hobby is actually reading a book. Why not the person who don't like reading a book? Sometime, man or woman feel need book after they found difficult problem or maybe exercise. Well, probably you will want this Materials Design Inspired by Nature: Function Through Inner Architecture (RSC Smart Materials).

#### **Jesse Linder:**

Typically the book Materials Design Inspired by Nature: Function Through Inner Architecture (RSC Smart Materials) will bring you to the new experience of reading some sort of book. The author style to clarify the idea is very unique. In the event you try to find new book to learn, this book very appropriate to you. The book Materials Design Inspired by Nature: Function Through Inner Architecture (RSC Smart Materials) is much recommended to you to read. You can also get the e-book from your official web site, so you can more readily to read the book.

#### **Jerry Rivera:**

The particular book Materials Design Inspired by Nature: Function Through Inner Architecture (RSC Smart Materials) has a lot of knowledge on it. So when you check out this book you can get a lot of benefit. The book was authored by the very famous author. The author makes some research previous to write this book. This book very easy to read you can get the point easily after reading this article book.

#### **Robert Rooks:**

What is your hobby? Have you heard that question when you got pupils? We believe that that issue was given by teacher with their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person just like reading or as reading become their hobby. You must know that reading is very important along with book as to be the point. Book is important thing to increase you knowledge, except your personal teacher or lecturer. You find good news or update about something by book. Numerous books that can you choose to use be your object. One of them is actually Materials Design Inspired by Nature: Function Through Inner Architecture (RSC Smart Materials).
