**Robust Automatic Speech Recognition: A Bridge to Practical Applications** Jinyu Li, Li Deng, Reinhold Haeb-Umbach, Yifan Gong

Robust Automatic Speech Recognition: A Bridge to Practical Applications establishes a solid foundation for automatic speech recognition that is robust against acoustic environmental distortion. It provides a thorough overview of classical and modern noise- and reverberation robust techniques that have been developed over the past thirty years, with an emphasis on practical methods that have been proven to be successful and which are likely to be further developed for future applications. The strengths and weaknesses of robustness-enhancing speech recognition techniques are carefully analyzed. The book covers noise-robust techniques designed for acoustic models which are based on both Gaussian mixture models and deep neural networks. In addition, a guide to selecting the best methods for practical applications is provided. The reader will:

- Gain a unified, deep and systematic understanding of the state-of-the-art technologies for robust speech recognition
  - Learn the links and relationship between alternative technologies for robust speech recognition
  - Be able to use the technology analysis and categorization detailed in the book to guide future technology development
  - Be able to develop new noise-robust methods in the current era of deep learning for acoustic modeling in speech recognition
- 
- The first book that provides a comprehensive review on noise and reverberation robust speech recognition methods in the era of deep neural networks
  - Connects robust speech recognition techniques to machine learning paradigms with rigorous mathematical treatment
  - Provides elegant and structural ways to categorize and analyze noise-robust speech recognition techniques
  - Written by leading researchers who have been actively working on the subject matter in both industrial and academic organizations for many years

### **From reader reviews:**

#### **Gary Flint:**

Now a day people who Living in the era exactly where everything reachable by match the internet and the resources within it can be true or not require people to be aware of each information they get. How many people to be smart in having any information nowadays? Of course the answer is reading a book. Looking at a book can help men and women out of this uncertainty Information specifically this Robust Automatic Speech Recognition: A Bridge to Practical Applications book since this book offers you rich information and knowledge. Of course the data in this book hundred per cent guarantees there is no doubt in it you may already know.

#### **Janet Kline:**

The guide untitled Robust Automatic Speech Recognition: A Bridge to Practical Applications is the book that recommended to you to learn. You can see the quality of the publication content that will be shown to you. The language that article author use to explained their ideas are easily to understand. The article writer was did a lot of research when write the book, to ensure the information that they share to you is absolutely accurate. You also might get the e-book of Robust Automatic Speech Recognition: A Bridge to Practical Applications from the publisher to make you a lot more enjoy free time.

#### **Irene Carpenter:**

The guide with title Robust Automatic Speech Recognition: A Bridge to Practical Applications contains a lot of information that you can understand it. You can get a lot of help after read this book. This kind of book exist new expertise the information that exist in this book represented the condition of the world today. That is important to yo7u to find out how the improvement of the world. This book will bring you throughout new era of the globalization. You can read the e-book in your smart phone, so you can read that anywhere you want.

#### **Stanley Cooper:**

Robust Automatic Speech Recognition: A Bridge to Practical Applications can be one of your basic books that are good idea. We recommend that straight away because this book has good vocabulary which could increase your knowledge in terminology, easy to understand, bit entertaining but nonetheless delivering the information. The article author giving his/her effort to set every word into joy arrangement in writing Robust Automatic Speech Recognition: A Bridge to Practical Applications but doesn't forget the main stage, giving the reader the hottest along with based confirm resource data that maybe you can be one among it. This great information could drawn you into completely new stage of crucial pondering.
