Neuromodulation, Vol. 1

Neuromodulation, Vol. 1

Neuromodulation will be the first comprehensive and in-depth reference textbook covering all aspects of the rapidly growing field of neuromodulation. This book provides a complete discussion of the fundamental principles of neuromodulation and therapies applied to the brain, spinal cord, peripheral nerves, autonomic nerves and various organs. The textbook is highly structured and organized into overarching sections that cover chronic pain, movement disorders, psychiatric disorders, epilepsy, functional electrical stimulation, cardiac, gastrointestinal, genitourinary and organ neuromodulation. The fundamental principles of electricity and infusion, neural tissue interface, biomedical engineering, neuromodulation devices, basic science, neuroanatomy, neurophysiology, imaging and mechanisms are emphasized. In addition to providing details pertaining to the state-of-the-art current practice, innovative and emerging applications are discussed in specific chapters. Finally, the textbook provides specific chapters focusing on the technical aspects of the various neuromodulation procedures as well as technical specifications of various implantable devices. All of the contributors to Neuromodulation represent leading experts in the field. The editors are internationally renowned in their respective fields of neuromodulation, pain management, functional neurosurgery and biomedical engineering. Neuromodulation will be the first and foremost authoritative text on neuromodulation therapies and will establish the gold standard that defines the field for years to come. To register to receive updates on this publication please [Click Here](#) to take survey **Key Features** * The first comprehensive reference on the emerging field of Neuromodulation* Editors and authors include all leading figures in the field, and the leaders of the International Neuromodulation Society* Close to 100 chapters on topics ranging from a layout of the fundamentals (e.g. neuroanatomy, plasticity, bioelectrical effects, infusion therapies), solutions for the biomedical engineering challenges (e.g. materials, how to preserve normal function etc.), to a rundown of the existing applications and their future promise.* Over 1200 pages in splendid full color, richly illustrated* Important areas of application include: - control of chronic pain - delivery of drugs to the nervous system via implanted devices - control of epilepsy, Parkinson, etc. - functional restoration, e.g. visual, auditory, restoration after stroke, restoration of motor function after traumatic events - stimulation of body organs via neural devices (incl. the heart, abdominal organs, genitourinary organs) - overview over newly emerging fields - control of obesity, blood pressure, tinnitus, brain injury, neurodegenerative diseases, brain-machine interfaces* Appendices go into detail about different techniques, and provide an overview over the present manufactures and the devices they make. * Support website with ancillary material and information about important developments in the field / clinical trials etc.

From reader reviews:

Gina Gregg:

Here thing why this particular Neuromodulation, Vol. 1 are different and dependable to be yours. First of all examining a book is good however it depends in the content from it which is the content is as yummy as food or not. Neuromodulation, Vol. 1 giving you information deeper and different ways, you can find any publication out there but there is no reserve that similar with Neuromodulation, Vol. 1. It gives you thrill reading journey, its open up your own personal eyes about the thing that happened in the world which is maybe can be happened around you. You can actually bring everywhere like in park your car, café, or even in your means home by train. In case you are having difficulties in bringing the imprinted book maybe the form of Neuromodulation, Vol. 1 in e-book can be your choice.

Rosa Johnson:

Now a day people that Living in the era wherever everything reachable by connect to the internet and the resources within it can be true or not demand people to be aware of each data they get. How individuals to be smart in receiving any information nowadays? Of course the solution is reading a book. Reading a book can help folks out of this uncertainty Information especially this Neuromodulation, Vol. 1 book because book offers you rich details and knowledge. Of course the knowledge in this book hundred pct guarantees there is no doubt in it as you know.

Della McDonald:

The particular book Neuromodulation, Vol. 1 has a lot details on it. So when you make sure to read this book you can get a lot of gain. The book was compiled by the very famous author. The author makes some research previous to write this book. This book very easy to read you may get the point easily after scanning this book.

Richard King:

You may get this Neuromodulation, Vol. 1 by check out the bookstore or Mall. Just simply viewing or reviewing it might to be your solve trouble if you get difficulties to your knowledge. Kinds of this publication are various. Not only simply by written or printed but also can you enjoy this book through e-book. In the modern era like now, you just looking of your mobile phone and searching what their problem. Right now, choose your current ways to get more information about your book. It is most important to arrange yourself to make your knowledge are still change. Let's try to choose proper ways for you.
