Marine Ecosystems and Climate Variation: The North Atlantic: A Comparative Perspective

Marine Ecosystems and Climate Variation: The North Atlantic: A Comparative Perspective

This research level text focuses on the influence of climate variability on the marine ecosystems of the North Atlantic. The ecological impact of climate variability on population dynamics is addressed at the full range of trophic levels, from phytoplankton through zooplankton and fish to marine birds. Climate effects on biodiversity and community structure are also examined. 40 scientists from around the world synthesise what is currently known about how climate affects the ecological systems of the North Atlantic and then place these insights within a broader ecological perspective. Many of the general features of the North Atlantic region are also seen in other marine ecosystems as well as terrestrial and freshwater systems. The final section of the book makes these generalities more explicit, so as to stimulate communication and promote co-operation amongst researchers who may previously have worked in semi-isolation.

The book comprises 5 main sections: background (general introduction, atmospheric and ocean climate of the North Atlantic, and modelling methodology), plankton populations (phytoplankton and zooplankton), fish and seabird populations, community ecology (phytoplankton, benthos and fish), and the final section consisting of six commentaries from scientists working in areas outside the North Atlantic marine sector. In order to enhance integration, a series of introductions link chapters and sections. Throughout the book, numerous examples highlight different aspects of ecology-climate interactions. They document recent progress and illustrate the challenges of trying to understand ecological processes and patterns in the light of climate variations.

From reader reviews:

Charles Davis:

Can you one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Try and pick one book that you never know the inside because don't evaluate book by its include may doesn't work the following is difficult job because you are afraid that the inside maybe not because fantastic as in the outside appearance likes. Maybe you answer can be Marine Ecosystems and Climate Variation: The North Atlantic: A Comparative Perspective why because the fantastic cover that make you consider in regards to the content will not disappoint you actually. The inside or content is fantastic as the outside or even cover. Your reading sixth sense will directly direct you to pick up this book.

Jeremy Reed:

Are you kind of active person, only have 10 as well as 15 minute in your day time to upgrading your mind ability or thinking skill possibly analytical thinking? Then you are receiving problem with the book than can satisfy your short period of time to read it because all this time you only find book that need more time to be learn. Marine Ecosystems and Climate Variation: The North Atlantic: A Comparative Perspective can be your answer because it can be read by anyone who have those short free time problems.

Ina French:

What is your hobby? Have you heard which question when you got learners? We believe that that issue was given by teacher to their students. Many kinds of hobby, All people has different hobby. Therefore you know that little person like reading or as looking at become their hobby. You should know that reading is very important as well as book as to be the factor. Book is important thing to provide you knowledge, except your personal teacher or lecturer. You get good news or update with regards to something by book. Amount types of books that can you choose to use be your object. One of them is actually Marine Ecosystems and Climate Variation: The North Atlantic: A Comparative Perspective.

Clyde King:

A number of people said that they feel fed up when they reading a publication. They are directly felt this when they get a half elements of the book. You can choose typically the book Marine Ecosystems and Climate Variation: The North Atlantic: A Comparative Perspective to make your own personal reading is interesting. Your own skill of reading skill is developing when you similar to reading. Try to choose basic book to make you enjoy to learn it and mingle the impression about book and looking at especially. It is to be initially opinion for you to like to wide open a book and examine it. Beside that the book Marine Ecosystems and Climate Variation: The North Atlantic: A Comparative Perspective can to be your brand new friend when you're truly feel alone and confuse using what must you're doing of that time.
