Biofuels from Algae: Chapter 12. Scale-Up and Commercialization of Algal Cultivation and Biofuel Production Man Kee Lam, Keat Teong Lee

Algae are currently being considered as a versatile feedstock for biofuel production because of their fast growth rate and high biomass productivity. Algae could simultaneously act as a carbon sink and water purifier if their cultivation were coupled with flue gas and wastewater treatment, respectively. Hence, an understanding of the overall supply chains for algal biofuel production is exceptionally important to determine whether it is worthwhile to scale up and commercialize algal cultivation for biofuel production. In this chapter, various aspects and constraints associated with the commercialization of algal biofuels are deliberated in detail, especially from the perspective of life-cycle energy balance. In addition, discussions on the economic assessments of algal biofuels are included in this chapter to provide an overview of the current state of algal biofuels in the fuel market. Potential algal biofuel conversion technologies, such as transesterification, starch hydrolysis and fermentation, pyrolysis, and hydrothermal liquefaction are also presented.

From reader reviews:

Darrell Fowler:

In this 21st hundred years, people become competitive in most way. By being competitive now, people have do something to make these survives, being in the middle of often the crowded place and notice through surrounding. One thing that at times many people have underestimated the item for a while is reading. Yep, by reading a e-book your ability to survive boost then having chance to remain than other is high. To suit your needs who want to start reading a book, we give you this particular Biofuels from Algae: Chapter 12. Scale-Up and Commercialization of Algal Cultivation and Biofuel Production book as basic and daily reading reserve. Why, because this book is greater than just a book.

Ruth McGrath:

The reserve with title Biofuels from Algae: Chapter 12. Scale-Up and Commercialization of Algal Cultivation and Biofuel Production has lot of information that you can find out it. You can get a lot of advantage after read this book. This kind of book exist new know-how the information that exist in this publication represented the condition of the world currently. That is important to yo7u to be aware of how the improvement of the world. That book will bring you throughout new era of the internationalization. You can read the e-book on your own smart phone, so you can read that anywhere you want.

Joycelyn Chambers:

In this era which is the greater individual or who has ability in doing something more are more valuable than other. Do you want to become one among it? It is just simple way to have that. What you should do is just spending your time very little but quite enough to get a look at some books. One of many books in the top list in your reading list is definitely Biofuels from Algae: Chapter 12. Scale-Up and Commercialization of Algal Cultivation and Biofuel Production. This book that is certainly qualified as The Hungry Hillside can get you closer in getting precious person. By looking upward and review this publication you can get many advantages.

Barbara Erickson:

Many people said that they feel weary when they reading a guide. They are directly felt it when they get a half parts of the book. You can choose the actual book Biofuels from Algae: Chapter 12. Scale-Up and Commercialization of Algal Cultivation and Biofuel Production to make your personal reading is interesting. Your own personal skill of reading expertise is developing when you similar to reading. Try to choose very simple book to make you enjoy to learn it and mingle the impression about book and studying especially. It is to be very first opinion for you to like to open up a book and go through it. Beside that the reserve Biofuels from Algae: Chapter 12. Scale-Up and Commercialization of Algal Cultivation and Biofuel Production can to be your friend when you're experience alone and confuse with what must you're doing of the time.
