**Principles of Planology: Grondslagen der planologie (Studies in International Planning History)** JM de Casseres

Between the World Wars the talent of Dutch town planner J.M. de Casseres (1902-1990) found expression in two visionary books and a clutch of influential articles. In an in-depth article published in February 1929 in the magazine *De Gids* under the title 'Grondslagen der planologie' (Principles of Planology) he invented a term for the new social-scientific discipline that would eventually enter the Dutch language.

De Casseres made it his life's work to elevate the art and craft of town planning to academic status, classifying the international planning body of knowledge and making it accessible and applicable. The results of this internationally supported body of knowledge are reflected not only in de Casseres's publications but also in a string of urban design proposals for towns across the Netherlands.

This republication of the De Gids article alongside five other influential de Casseres articles in translation and their original Dutch language form brings this key thinker into reach for a wider research audience.
