**The Clinical Science of Neurologic Rehabilitation (Contemporary Neurology Series)** Bruce H. Dobkin  
The Second Edition of this single-authored volume integrates multiple disciplines of basic and clinical research to help clinicians further develop the best possible care for the rehabilitation of patients with neurologic diseases. From the readable descriptions of the structures and functions of pathways for movement and cognition, the reader comes to understand the potential for training induced, pharmacologic, and near-future biologic interventions to enhance recovery. Dr. Dobkin shows how functional neuroimaging serves as a marker for whether physical, cognitive, and neuromodulating therapies work and how they sculpt the plasticity of the brain. Themes, such as how the manipulation of sensory experience can serve as a formidable tool for rehabilitation, run throughout the text, built from the level of the synapse to behaviors such as grasping, walking, and thinking. From illustrating how we may one day repair the brain and spinal cord to how to retrain spared and new pathways, Dr. Dobkin draws insights from a broad swath of fundamental research to give clinicians tools they can translate into bedside practices.

The book treats the medical complications and therapeutic approaches to neurologic diseases as an interconnected matrix. The management of common medical issues, impairments, and disabilities are described across diseases. Special problems posed by patients with stroke, myelopathies, brain injury, multiple sclerosis, degenerative diseases, and motor unit disorders receive individual comment. Short-term and delayed pulse interventions for patients, along with clinical trials, are dissected and put into perspective. The First Edition of this book was titled *Neurologic Rehabilitation*. The title has been changed to reflect Dr. Dobkin's sense that fundamental research now drives the field of neurologic rehabilitation even more than it could in 1996 when the First Edition was published. The Second Edition features entirely new chapters on functional neuroimaging of recovery; neurostimulators and neuroprostheses; integration into the book of many new clinical and neuroscientific observations relevant to the clinician; and extensive updating and expansion of all chapters.

Readers, whether clinicians serving the rehabilitation team, or students or researchers in neuroscience, neurology, physical medicine, allied health, or bioengineering, will acquire new insights and tools for creative pursuits that aim to lessen the disabilities of patients.

### **From reader reviews:**

#### **Rodney Alvarez:**

What do you think of book? It is just for students since they are still students or it for all people in the world, exactly what the best subject for that? Simply you can be answered for that query above. Every person has various personality and hobby per other. Don't to be pressured someone or something that they don't desire do that. You must know how great and important the book The Clinical Science of Neurologic Rehabilitation (Contemporary Neurology Series). All type of book would you see on many resources. You can look for the internet methods or other social media.

#### **Charles Stephens:**

Your reading 6th sense will not betray an individual, why because this The Clinical Science of Neurologic Rehabilitation (Contemporary Neurology Series) reserve written by well-known writer we are excited for well how to make book which might be understand by anyone who all read the book. Written in good manner for you, still dripping wet every ideas and publishing skill only for eliminate your hunger then you still skepticism The Clinical Science of Neurologic Rehabilitation (Contemporary Neurology Series) as good book but not only by the cover but also through the content. This is one e-book that can break don't assess book by its include, so do you still needing one more sixth sense to pick this specific!?! Oh come on your reading through sixth sense already told you so why you have to listening to yet another sixth sense.

#### **Larry Parrish:**

You can find this The Clinical Science of Neurologic Rehabilitation (Contemporary Neurology Series) by browse the bookstore or Mall. Just viewing or reviewing it could possibly to be your solve problem if you get difficulties for your knowledge. Kinds of this publication are various. Not only by written or printed and also can you enjoy this book by simply e-book. In the modern era such as now, you just looking of your mobile phone and searching what your problem. Right now, choose your ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still change. Let's try to choose correct ways for you.

#### **John Bennett:**

Some individuals said that they feel weary when they reading a reserve. They are directly felt the item when they get a half areas of the book. You can choose the book The Clinical Science of Neurologic Rehabilitation (Contemporary Neurology Series) to make your personal reading is interesting. Your own personal skill of reading proficiency is developing when you including reading. Try to choose easy book to make you enjoy to learn it and mingle the idea about book and looking at especially. It is to be first opinion for you to like to open up a book and read it. Beside that the reserve The Clinical Science of Neurologic Rehabilitation (Contemporary Neurology Series) can to be a newly purchased friend when you're experience alone and confuse with what must you're doing of the time.
