The incidence of stenosis of the lacrimal system is increasing. Nasolacrimal diseases and problems are encountered by otolaryngologists, ophthalmologists, plastic surgeons and radiologists. Constant epiphora is the most common symptom associated with nasolacrimal duct obstruction. This is the first book to cover all currently available methods to manage pre-, intra- and post-lacrimal sac stenosis. Comprehensive multidisciplinary approaches in adults and children are described. International experts provide a stepwise analysis and describe the clinical management of these patients with detailed medical and surgical treatment plans. With this excellent guide the reader will be able to solve any problem that may occur with the reconstruction of a disturbed or damaged lacrimal system.
