Vision for Life, Revised Edition: Ten Steps to Natural Eyesight Improvement Meir Schneider Ph.D.

All parts of the body need exercise for optimal health, and the eyes are no different. *Vision for Life* presents an approach to eye health for people with 20/20 vision who wish to maintain their perfect vision as well as people who see poorly and would like to improve their eyesight.

Clients of the Meir Schneider Self-Healing Method experience their own capacity to bring about recovery, reversing the progress of a wide range of degenerative conditions including eye disease. Based in part on the established Bates Method of eyesight improvement and in part on his own professional and personal discoveries, Meir Schneider's pioneering approach has helped thousands of people successfully treat a host of eye problems, including near- and farsightedness, astigmatism, lazy eye, double vision, glaucoma, cataracts, macular degeneration, retinal detachment, retinitis pigmentosa, and nystagmus. This revised edition includes a new chapter on children's eye health and new research and exercises for specific conditions, i.e., glaucoma and nystagmus, near- and farsightedness.

Born blind to deaf parents, Schneider underwent a series of painful operations as a young child and was left with 99 percent scar tissue on the lenses of his eyes, resulting in his being declared incurably blind. At the age of seventeen, he discovered how to improve his vision from less than 1 percent to 55 percent of normal vision with the eye exercises presented in this book. Today Schneider drives a car, reads, and enjoys the benefits of full natural vision. He and his clients prove time and time again how much vision can improve with exercise. His contributions to the field of self-healing are recognized by alternative health practitioners and medical doctors alike.

In *Vision for Life*, Schneider shares forty years of discoveries made on his personal and professional journey. The book details simple but effective techniques to gain great vision such as sunning and palming. Such exercises are not only strengthening but also restorative and deeply relaxing. The reader learns how to reverse developing issues before they cause damage or to remedy existing problems, including pathologies such as glaucoma, cataracts, macular degeneration, retinal detachment, and optic nerve neuropathy.
