Fundamentals of Natural Computing: Basic Concepts, Algorithms, and Applications (Chapman & Hall/CRC Computer and Information Science Series)

Leandro Nunes de Castro

Fundamentals of Natural Computing: Basic Concepts, Algorithms, and Applications (Chapman & Hall/CRC Computer and Information Science Series) Leandro Nunes de Castro
Natural computing brings together nature and computing to develop new computational tools for problem solving; to synthesize natural patterns and behaviors in computers; and to potentially design novel types of computers. Fundamentals of Natural Computing: Basic Concepts, Algorithms, and Applications presents a wide-ranging survey of novel techniques and important applications of nature-based computing.

This book presents theoretical and philosophical discussions, pseudocodes for algorithms, and computing paradigms that illustrate how computational techniques can be used to solve complex problems, simulate nature, explain natural phenomena, and possibly allow the development of new computing technologies. The author features a consistent and approachable, textbook-style format that includes lucid figures, tables, real-world examples, and different types of exercises that complement the concepts while encouraging readers to apply the computational tools in each chapter. Building progressively upon core concepts of nature-inspired techniques, the topics include evolutionary computing, neurocomputing, swarm intelligence, immunocomputing, fractal geometry, artificial life, quantum computing, and DNA computing.

Fundamentals of Natural Computing is a self-contained introduction and a practical guide to nature-based computational approaches that will find numerous applications in a variety of growing fields including engineering, computer science, biological modeling, and bioinformatics.

From reader reviews:

Jack Young:

Nowadays reading books are more than want or need but also turn into a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge the actual information inside the book which improve your knowledge and information. The knowledge you get based on what kind of publication you read, if you want send more knowledge just go with schooling books but if you want sense happy read one together with theme for entertaining such as comic or novel. The Fundamentals of Natural Computing: Basic Concepts, Algorithms, and Applications (Chapman & Hall/CRC Computer and Information Science Series) is kind of reserve which is giving the reader unforeseen experience.

Zola Campbell:

This Fundamentals of Natural Computing: Basic Concepts, Algorithms, and Applications (Chapman & Hall/CRC Computer and Information Science Series) is great guide for you because the content that is full of information for you who always deal with world and possess to make decision every minute. This kind of book reveal it details accurately using great coordinate word or we can point out no rambling sentences in it. So if you are read that hurriedly you can have whole details in it. Doesn't mean it only provides you with straight forward sentences but tricky core information with wonderful delivering sentences. Having Fundamentals of Natural Computing: Basic Concepts, Algorithms, and Applications (Chapman & Hall/CRC Computer and Information Science Series) in your hand like finding the world in your arm, info in it is not ridiculous just one. We can say that no publication that offer you world within ten or fifteen tiny right but this reserve already do that. So , this is certainly good reading book. Hey Mr. and Mrs. occupied do you still doubt this?

Deborah Young:

Reading a book to become new life style in this year; every people loves to examine a book. When you learn a book you can get a lots of benefit. When you read books, you can improve your knowledge, mainly because book has a lot of information into it. The information that you will get depend on what types of book that you have read. If you wish to get information about your analysis, you can read education books, but if you act like you want to entertain yourself look for a fiction books, these kinds of us novel, comics, in addition to soon. The Fundamentals of Natural Computing: Basic Concepts, Algorithms, and Applications (Chapman & Hall/CRC Computer and Information Science Series) will give you new experience in looking at a book.

Rita Beatty:

Don't be worry when you are afraid that this book will filled the space in your house, you might have it in e-book approach, more simple and reachable. This kind of Fundamentals of Natural Computing: Basic

Concepts, Algorithms, and Applications (Chapman & Hall/CRC Computer and Information Science Series) can give you a lot of buddies because by you taking a look at this one book you have thing that they don't and make an individual more like an interesting person. This book can be one of one step for you to get success. This guide offer you information that probably your friend doesn't understand, by knowing more than other make you to be great persons. So , why hesitate? We should have Fundamentals of Natural Computing: Basic Concepts, Algorithms, and Applications (Chapman & Hall/CRC Computer and Information Science Series).
