Java Enterprise Best Practices O'Reilly Java Authors

Java developers typically go through four "stages" in mastering Java. In the first stage, they learn the language itself. In the second stage, they study the APIs. In the third stage, they become proficient in the environment. It is in the fourth stage --"the expert stage"-- where things really get interesting, and *Java Enterprise Best Practices* is the tangible compendium of experience that developers need to breeze through this fourth and final stage of Enterprise Java mastery. Crammed with tips and tricks, *Java Enterprise Best Practices* distills years of solid experience from eleven experts in the J2EE environment into a practical, to-the-point guide to J2EE. *Java Enterprise Best Practices* gives developers the unvarnished, expert-tested advice that the man pages don't provide--what areas of the APIs should be used frequently (and which are better avoided); elegant solutions to problems you face that other developers have already discovered; what things you should always do, what things you should consider doing, and what things you should never do--even if the documentation says it's ok. Until *Java Enterprise Best Practices*, Java developers in the fourth stage of mastery relied on the advice of a loose-knit community of fellow developers, time-consuming online searches for examples or suggestions for the immediate problem they faced, and tedious trial-and-error. But Java has grown to include a huge number of APIs, classes, and methods. Now it is simply too large for even the most intrepid developer to know it all. The need for a written compendium of J2EE Best Practices has never been greater. *Java Enterprise Best Practices* focuses on the Java 2 Enterprise Edition (J2EE) APIs. The J2EE APIs include such alphabet soup acronyms as EJB, JDBC, RMI, XML, and JMX.

From reader reviews:

Michael Floyd:

In this 21st centuries, people become competitive in each and every way. By being competitive currently, people have do something to make these individuals survives, being in the middle of the actual crowded place and notice by means of surrounding. One thing that often many people have underestimated the item for a while is reading. Yes, by reading a guide your ability to survive enhance then having chance to remain than other is high. For you personally who want to start reading some sort of book, we give you this particular Java Enterprise Best Practices book as beginning and daily reading reserve. Why, because this book is more than just a book.

Jeanne Linder:

Reading a book for being new life style in this year; every people loves to study a book. When you read a book you can get a lots of benefit. When you read publications, you can improve your knowledge, since book has a lot of information upon it. The information that you will get depend on what kinds of book that you have read. If you want to get information about your examine, you can read education books, but if you act like you want to entertain yourself look for a fiction books, these us novel, comics, as well as soon. The Java Enterprise Best Practices will give you new experience in reading through a book.

Travis Berry:

In this period of time globalization it is important to someone to acquire information. The information will make you to definitely understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of personal references to get information example: internet, magazine, book, and soon. You will see that now, a lot of publisher which print many kinds of book. Often the book that recommended for you is Java Enterprise Best Practices this guide consist a lot of the information in the condition of this world now. That book was represented how does the world has grown up. The terminology styles that writer make usage of to explain it is easy to understand. Typically the writer made some analysis when he makes this book. This is why this book suitable all of you.

Daniel Martin:

As a scholar exactly feel bored in order to reading. If their teacher asked them to go to the library or to make summary for some e-book, they are complained. Just very little students that has reading's soul or real their pastime. They just do what the teacher want, like asked to the library. They go to there but nothing reading seriously. Any students feel that examining is not important, boring along with can't see colorful images on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore , this Java Enterprise Best Practices can make you experience more interested to read.
