**Gas, Dust and Hybrid Explosions (Fundamental Studies in Engineering)** W.E. Baker, M.J. Tang  
Damaging accidental explosions are a continuous threat to industry. Categories for such explosions include combustible dust explosions; reactive gas explosions, both confined and unconfined; hybrid explosions involving both gases and dusts; bursts of pressure vessels and piping; and liquid propellant explosions. This book evaluates the physical processes and resulting blast effects for these types of explosions. Special attention is given to reactive gas explosions, both confined and unconfined. This latter class of explosion has occurred all too frequently in refineries and petrochemical complexes, and is also one of the most difficult to predict and evaluate. Much recent work on this topic is reviewed and summarized. This is the only publication of its kind, to date, that offers such a thorough coverage of these types of industrial explosions.  
[p]

Each class of explosion source is reviewed separately, first discussing fundamentals, then presenting methods of analysis and testing, and finally giving curves or equations to predict effects of the particular class of explosion. An extensive bibliography is included together with tables of pertinent properties of explosive materials. The text also includes many figures, equations, tables and a keyword index.

The book is intended for researchers in the field of characterizing and mitigating industrial explosions. It will also be of interest to engineers, scientists, and insurers involved in processes.

### **From reader reviews:**

#### **Rose Rowe:**

Gas, Dust and Hybrid Explosions (Fundamental Studies in Engineering) can be one of your basic books that are good idea. All of us recommend that straight away because this book has good vocabulary that can increase your knowledge in terminology, easy to understand, bit entertaining but nonetheless delivering the information. The author giving his/her effort to set every word into satisfaction arrangement in writing Gas, Dust and Hybrid Explosions (Fundamental Studies in Engineering) yet doesn't forget the main place, giving the reader the hottest and based confirm resource details that maybe you can be one among it. This great information can drawn you into fresh stage of crucial imagining.

#### **Ray Nicolas:**

Is it an individual who having spare time then spend it whole day simply by watching television programs or just lying on the bed? Do you need something totally new? This Gas, Dust and Hybrid Explosions (Fundamental Studies in Engineering) can be the answer, oh how comes? The new book you know. You are therefore out of date, spending your time by reading in this completely new era is common not a geek activity. So what these publications have than the others?

#### **George Bash:**

As a student exactly feel bored to help reading. If their teacher requested them to go to the library in order to make summary for some reserve, they are complained. Just small students that has reading's internal or real their passion. They just do what the professor want, like asked to the library. They go to presently there but nothing reading significantly. Any students feel that reading through is not important, boring and also can't see colorful images on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore , this Gas, Dust and Hybrid Explosions (Fundamental Studies in Engineering) can make you experience more interested to read.

#### **Phillip Chadwick:**

What is your hobby? Have you heard that question when you got students? We believe that that problem was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. Therefore you know that little person like reading or as reading through become their hobby. You have to know that reading is very important in addition to book as to be the point. Book is important thing to provide you knowledge, except your own teacher or lecturer. You get good news or update about something by book. Numerous books that can you choose to adopt be your object. One of them is actually Gas, Dust and Hybrid Explosions (Fundamental Studies in Engineering).
