Increasing Perceptual Skills of Robots Through Proximal Force/Torque Sensors: A Study for the Implementation of Active Compliance on the iCub Humanoid Robot (Springer Theses) Matteo Fumagalli

This thesis proposes an effective methodology for enhancing the perceptual capabilities and achieving interaction control of the iCub humanoid robot. The method is based on the integration of measurements from different sensors (force/torque, inertial and tactile sensors) distributed along the robot's kinematic chain. Humanoid robots require a substantial amount of sensor information to create their own representations of the surrounding environment. Tactile perception is of primary importance for the exploration process. Also in humans, the tactile system is completely functional at birth. In humanoid robotics, the measurements of forces and torques that the robot exchanges with its surroundings are essential for safe interaction with the environment and with humans. The approach proposed in this thesis can successfully enhance the perceptual capabilities of robots by exploiting only a limited number of both localized and distributed sensors, providing a feasible and convenient solution for achieving active compliance control of humanoid robots.

From reader reviews:

Diana Sturgill:

In this 21st century, people become competitive in each way. By being competitive today, people have to do something to make these people survive, being in the middle of often the crowded place and notice through surrounding. One thing that sometimes many people have underestimated the idea for a while is reading. Yep, by reading a publication your ability to survive improve then having chance to remain than other is high. For you who want to start reading any book, we give you this Increasing Perceptual Skills of Robots Through Proximal Force/Torque Sensors: A Study for the Implementation of Active Compliance on the iCub Humanoid Robot (Springer Theses) book as starter and daily reading publication. Why, because this book is more than just a book.

Freddy Lamberth:

Exactly why? Because this Increasing Perceptual Skills of Robots Through Proximal Force/Torque Sensors: A Study for the Implementation of Active Compliance on the iCub Humanoid Robot (Springer Theses) is an unordinary book that the inside of the e-book waiting for you to snap that but latter it will surprise you with the secret the idea inside. Reading this book alongside it was fantastic author who else write the book in such wonderful way makes the content inside easier to understand, entertaining technique but still convey the meaning totally. So , it is good for you for not hesitating having this nowadays or you going to regret it. This excellent book will give you a lot of rewards than the other book include such as help improving your skill and your critical thinking method. So , still want to delay having that book? If I were being you I will go to the e-book store hurriedly.

Jennifer Garza:

Many people spending their time period by playing outside using friends, fun activity together with family or just watching TV 24 hours a day. You can have new activity to invest your whole day by reading a book. Ugh, do you consider reading a book really can hard because you have to use the book everywhere? It fine you can have the e-book, delivering everywhere you want in your Cell phone. Like Increasing Perceptual Skills of Robots Through Proximal Force/Torque Sensors: A Study for the Implementation of Active Compliance on the iCub Humanoid Robot (Springer Theses) which is getting the e-book version. So , why not try out this book? Let's observe.

Steve Pinson:

A lot of people said that they feel bored when they reading a e-book. They are directly felt this when they get a half parts of the book. You can choose the book Increasing Perceptual Skills of Robots Through Proximal Force/Torque Sensors: A Study for the Implementation of Active Compliance on the iCub Humanoid Robot (Springer Theses) to make your personal reading is interesting. Your current skill of reading ability is

developing when you like reading. Try to choose simple book to make you enjoy to read it and mingle the sensation about book and studying especially. It is to be 1st opinion for you to like to wide open a book and go through it. Beside that the publication *Increasing Perceptual Skills of Robots Through Proximal Force/Torque Sensors: A Study for the Implementation of Active Compliance on the iCub Humanoid Robot* (Springer Theses) can to be a newly purchased friend when you're sense alone and confuse with what must you're doing of that time.
