Book's Academic Scope: All the state science standards in the unit of "Anatomy & Physiology."

We want our children to be successful in school. The question is "How?"

Today, we need to speak to children's brains the RIGHT way.

We know that, from cognitive studies / standardized tests:

- * Over 80% of human learning is visual
- * Concepts depicted in drawings and sketches improves learning by 5~6X
- * Visual storytelling is the most universal and cross-cultural communication.
- * 25+% of our students are NOT fully proficient in grade level reading.
- * 14.2% of our students are ELL (English Language Learners)

Given the data above, we should not simply give our students wordy textbooks/workbooks and expect EVERY student to do well.

This comic book addresses the above problems. It teaches science in the most effective way possible. And it makes everyone's life easier:

- For Teachers: ELL/reading/learner-support. Standard-based reviews are fun and effective.
- For Students: No concept is too hard, and you now have a "textbook" that is a joy to read.
- For Parents: Your child has less stress and more rest because concepts are learned much more quickly.

The Science Standards Illustrated series contains 5 volumes:

Volume 1: Ecology

Volume 2: Cell Biology

Volume 3: Genetics

Volume 4: Evolution

Volume 5: Anatomy & Physiology
