From Cells to Societies: Models of Complex Coherent Action (Springer Series in Synergetics)

Alexander S. Mikhailov, Vera Calenbuhr

Using simple models this book shows how we can gain insights into the behavior of complex systems. It is devoted to the discussion of functional self-organization in large populations of interacting active elements. The authors have chosen a series of models from physics, biochemistry, biology, sociology and economics, and systematically discuss their general properties. The book addresses researchers and graduate students in a variety of disciplines.
