Human-computer Interaction and Management Information Systems: Foundations: Foundations (Advances in Management Information Systems) Ping Zhang, Dennis F. Galletta
"Human-Computer Interaction and Management Information Systems: Foundations" offers state-of-the-art research by a distinguished set of authors who span the MIS and HCI fields. The original chapters provide authoritative commentaries and in-depth descriptions of research programs that will guide 21st century scholars, graduate students, and industry professionals. Human-Computer Interaction (or Human Factors) in MIS is concerned with the ways humans interact with information, technologies, and tasks, especially in business, managerial, organizational, and cultural contexts. It is distinctive in many ways when compared with HCI studies in other disciplines. The MIS perspective affords special importance to managerial and organizational contexts by focusing on analysis of tasks and outcomes at a level that considers organizational effectiveness. With the recent advancement of technologies and development of many sophisticated applications, human-centeredness in MIS has become more critical than ever before. This book focuses on the basics of HCI, with emphasis on concepts, issues, theories, and models that are related to understanding human tasks, and the interactions among humans, tasks, information, and technologies in organizational contexts in general.

From reader reviews:

Maria Gomez:

Why don't make it to be your habit? Right now, try to ready your time to do the important action, like looking for your favorite publication and reading a publication. Beside you can solve your long lasting problem; you can add your knowledge by the guide entitled Human-computer Interaction and Management Information Systems: Foundations: Foundations (Advances in Management Information Systems). Try to stumble through book Human-computer Interaction and Management Information Systems: Foundations: Foundations (Advances in Management Information Systems) as your buddy. It means that it can being your friend when you sense alone and beside that course make you smarter than ever before. Yeah, it is very fortuned for yourself. The book makes you more confidence because you can know every thing by the book. So , we need to make new experience and knowledge with this book.

Steven Thomas:

What do you think about book? It is just for students since they're still students or that for all people in the world, what the best subject for that? Only you can be answered for that issue above. Every person has various personality and hobby for each other. Don't to be forced someone or something that they don't want do that. You must know how great and also important the book Human-computer Interaction and Management Information Systems: Foundations: Foundations (Advances in Management Information Systems). All type of book could you see on many solutions. You can look for the internet options or other social media.

Kevin Masterson:

This Human-computer Interaction and Management Information Systems: Foundations: Foundations (Advances in Management Information Systems) is great book for you because the content that is certainly full of information for you who else always deal with world and get to make decision every minute. This specific book reveal it info accurately using great arrange word or we can declare no rambling sentences inside. So if you are read the idea hurriedly you can have whole info in it. Doesn't mean it only will give you straight forward sentences but hard core information with lovely delivering sentences. Having Human-computer Interaction and Management Information Systems: Foundations: Foundations (Advances in Management Information Systems) in your hand like keeping the world in your arm, details in it is not ridiculous one particular. We can say that no guide that offer you world with ten or fifteen minute right but this guide already do that. So , this really is good reading book. Hello Mr. and Mrs. active do you still doubt that?

Carolyn Rodriguez:

Is it a person who having spare time subsequently spend it whole day by means of watching television

programs or just telling lies on the bed? Do you need something totally new? This Human-computer Interaction and Management Information Systems: Foundations: Foundations (Advances in Management Information Systems) can be the response, oh how comes? A fresh book you know. You are so out of date, spending your free time by reading in this brand new era is common not a geek activity. So what these textbooks have than the others?
